Education

University of Notre Dame | Notre Dame, IN

Bachelor of Business Administration | *Business Honors Program* | *Expected Graduation: May 2027* | *GPA: 3.63*

- Major: Business Analytics | Minors: Impact Consulting, Liturgical Music Ministry, Theology
 - Presented with a team in five consulting case competitions for Deloitte, KPMG, West Monroe, Davita, and 84.51°
 - Produced weekly managerial memos and technical R reports for real-world retail pricing analytics cases
-

Experience

Dhiyasoft LLC | Remote

App Developer Intern | *Jun 2026 – Aug 2026*

- Contributing to the development and verification of Salesforce-adjacent application features, identifying and resolving software issues through structured debugging and formal code review
- Collaborating with the consulting team on client project execution, participating in technical project discussions and code reviews within an agile development workflow
- Maintaining project transparency and client deliverable quality through structured documentation updates and progress reporting across all assigned development tasks
- Gaining hands-on exposure to enterprise CRM ecosystems, Salesforce platform architecture, and technology consulting workflows in a certified Salesforce partner environment

Verso Ministries | Notre Dame, IN

Operations Intern | *Aug 2025 – May 2026*

- Engineered a data-driven market entry strategy into the African continent by scraping, cleaning, and benchmarking DMC service offerings across the region, driving informed decision-making for new business partnerships and widening the company's global footprint.
- Synthesized 10 years of disparate customer data from multiple sources using Python for a targeted outreach strategy, driving a personalized approach to customer engagement and retention.
- Identified critical friction points in documentation workflows, automating manual processes using spreadsheet functions, backend JavaScript, and Google Gemini to engineer SOPs that reduced documentation time by 20% across 100+ trip offerings.
- Maintained a 100% ticket resolution rate in HubSpot CRM within a 24-hour SLA across all customer inquiries.
- Managed sensitive datasets integrating traveler flight, health, and passport information for international DMCs, ensuring data integrity across a high-stakes, compliance-sensitive operation

Confidential Hedge Fund | Bethesda, MD

Research & Analytics Intern | *July 2025 – Aug 2025*

- Synthesized complex market and industry research into executive-ready intelligence, delivering findings directly to senior investment leadership to inform high-stakes portfolio decision-making.
 - Developed Python scripts to scrape and process bulk financial data at scale, storing structured results in MongoDB to automate and accelerate the firm's decision-making pipeline
 - Architected web-scraping tools to systematically extract critical metadata from financial news sources and industry publications, dramatically reducing the time required to surface accurate market intelligence
-
